

Mental Health • Substance Use Intellectual & Developmental Disabilities

We exist to help people live their best lives.

New Vista is Kentucky's leading provider of treatment for mental health, substance use, and intellectual and developmental disabilities, with 300 dedicated doctors and clinicians treating 25,000 Kentuckians annually. Treatment consists of the most effective, evidence-based methods to help individuals and families become healthier, happier and lead more productive lives.

Regional Offices Provide Care Close to Home

Nearly 800,000 Kentuckians live in our 17-county service area. New Vista has four Anchor Centers in Danville, Lexington, Georgetown, and Richmond with satellite offices in surrounding counties. We strive to offer more convenience to our clients and foster partnerships with local resources to help clients in their community.

New Vista Creates Custom Treatment Plans

The numbers are startling - 23 million Americans are dependent on alcohol and drugs. More than nine million have both mental health and substance use disorders. However, treatment does work with 20 million in recovery. New Vista helps individuals and families take back control of their lives. Medicaid and private insurance cover mental health and substance use disorders like any other disease. Most individuals receive coverage for the cost of treatment. If you or a friend need help, New Vista develops custom treatment plans for successful outcomes.
